

A Number of candidates sitting the 2024 familiarisation Test A and the average marks

	Maths			English		
	Number sitting test	Average mark (50 Qs)	Average percentage	Number sitting test	Average mark (65 Qs)	Average percentage
Male	555	30.2	60%	555	31.2	48%
Female	545	26.7	53%	545	32.4	50%
Total	1,100	28.4	57%	1,100	31.8	49%

B Explanation of standardised scores

The standardised score is calculated in the following manner:

The average (mean) score for each paper is re-based to a standardised score of 100.

The standard deviation of the results is re-based to a value of 15.

A candidate's standardised score is calculated by determining how many standard deviations their score is from the mean score, multiplying the answer by 15 (the re-based value of 1 standard deviation) and either adding or subtracting the calculated value from 100 (the standardised mean score) depending on whether they scored above or below the mean.

Example : mean score=30, one standard deviation=4.5, candidate score=33.

Candidate's standardised score= $100 + ((33-30)/4.5)*15 = 100 + 10 = 110$
